• GenAI

• JavaScript

• UX Design

• Azure

• Python

• Agile (Scrum & Kanban)

Employment History

Founder & President | January 2026 - Present

FIREFLY IN THE DARK

- Firefly in the Dark is an independent studio specializing in AI prototyping, UX engineering, and technology education
- Advise organizations on AI integration strategy, agentic system design, and product development
- Manage an editorial platform covering human-AI interaction, technology ethics, and the future of digital culture — including long-form writing, case studies, and podcast programming

UX Software Engineer, Lead | September 2018 - January 2026

BLUEPRINT TECHNOLOGIES

- Built experimental AI and data visualization interfaces translating large-scale enterprise data estates into actionable insights, bridging data engineering and business stakeholders through rapid prototyping and UX research
- Designed agentic AI systems leveraging large-scale enterprise data, enabling intelligent automation and decision support across complex business workflows for Fortune 500 clients
- Led development teams building cutting edge visualization and GenAI applications, managing full project lifecycle from ideation through production release
- Architected and implemented customer-facing UI/UX solutions using React, Fluent UI, and C# APIs integrated with Databricks and Azure services
- Leveraged AI acceleration tools and GenAI capabilities to rapidly prototype and deploy production-ready applications, reducing development cycles while maintaining high quality standards
